LUBRICANTS FOR INDUSTRIAL VEHICLES

THE MANUFACTURER'S CHOICE

- Products present as of factory fill
- Multi-manufacturer
- Multi-accreditation

PROVEN, VALIDATED RESULTS

- A rigorous process ranging from laboratory tests to fleet tests, to obtain the best formulation

ENVIRONMENT AND FUEL ECONOMY

- ECO ACTIV formulations
- Reduction of polluting emissions from vehicles
- Compatible with vehicles according to EURO VI environmental standards

Your dealer will be able to advise you.

Energy is our future. Let's save it!

Creation: agence-sirocco.fr

A COMPLETE I.V. RANGE TO MEET WITH YOUR DAILY CHALLENGES

The daily strain put on your vehicles under various conditions leads to **wear and tear caused by temperature, friction or even pressure which can ultimately lead to complications** such as premature wear, leaks, engine fouling... These problems result in additional repair costs and downtime within your fleet.

In other words, your vehicles lose their resale value and their service life over time decreases.

DISTRIBUTION OF THE COST PRICE PER KILOMETRE

Our products and services help you reduce the cost of vehicle ownership, which represents more than 70% of the CPK.

→ A UNIQUE ECO ACTIV FORMULA THAT MAKES A DIRECT IMPACT ON YOUR CONSUMPTION

REDUCE YOUR CONSUMPTION BY UP TO 2%

With the additive packs and latest-generation base oil, ECO ACTIV formulations **lower the viscosity of lubricants, providing better lubrication of mechanical parts** and reducing friction.

All these characteristics taken together makes it possible to **significantly reduce energy losses and considerably reduce fuel consumption.**

Suitable for all vehicles and all brands, ECO ACTIV products guarantee you:

PROFITABILITY & ENVIRONMENTAL PROTECTION

A reduction in CO₂ emissions and better profitability **as a result of fuel savings and lower maintenance costs.**

DURABILITY & RELIABILITY

Better vehicle performance over time thanks to the reliability of products tested in the laboratory, on the test bench and in real conditions.

→ MAXEON FAMILY

Dedicated to EURO VI engines, the MAXEON range has been designed to give the best compromise between performance and maintenance rationalization.

Choose the lubricant that corresponds to your business, your fleet (diesel or gas), whether or not it is multi-brand and the different models it contains.

MAXEON RLD-5 ECO 5W-30

- Lubricant specially adapted for Euro VI DTi 13 Step D engines
- Provides the greatest fuel savings with its exceptional ECO ACTIV formulation
- Guarantees a maximum oil change interval on Renault Trucks vehicles

MAXEON XE6 ECO 5W-30

- Suitable for almost all manufacturers, which makes the lubricant ideal for rationalizing products in the workshop
- Provides rapid lubrication of various critical engine parts during start-up with its 5W cold grade

MAXEON ME6 ECO 10W-30

- Impeccably clean vehicle components
- Gives the best compromise between performance and price

MAXEON CRX ECO 10W-30

- Provides thermal stability and exceptional wear protection
- Also suitable for some public works and agricultural machinery

MAXEON DG6 10W-40

- Suitable for most Gas and Diesel vehicles
- Compatible with Euro I to Euro VI vehicles

MAXEON SG6 15W-40

- Suitable for all ranges of Gas and Diesel vehicles
- Maximum interval between oil changes

→ MAXIMA FAMILY

Spread out the intervals between oil changes and extend the service life of your vehicles with the MAXIMA product family. MAXIMA offers a wide range of lubricants for HGV engines without particle filters up to Euro V.

MAXIMA RLD ECO 15W-30

- ECO ACTIV lubricant suitable for Diesel engines to save fuel
- Perfectly suited for all uses (Agri, Public works, Road)

MAXIMA RXD ECO 5W-30

- 100% synthetic ECO ACTIV formula
- Suitable for almost all manufacturers including Scania and IVECO, which makes it a very versatile product

MAXIMA RLD 15W-40

- Designed to lubricate diesel engines such as construction machinery (Agri, public works, etc.) and long-haul lorries
- Effectively combats engine fouling thanks to its additivation

MAXIMA HYBRID 15W-50

- Specially developed for hybrid vehicles
- Its unique additivation provides optimal protection of the engine against wear caused by starting and stopping

→ A SOLUTION FOR EACH TYPE OF FLEET

	RENAULT TRUCKS	VOLVO TRUCKS	MAN	SCANIA
RLD-5 ECO 5W-30	Euro VI 13L Step D	Euro VI 13L Step D		
CRX ECO 10W-30	Euro VI and earlier	Euro VI and earlier

	DAF	IVECO	MERCEDES	OTHER
RLD-5 ECO 5W-30				
CRX ECO 10W-30	Euro VI and some Euro Vs*		Euro VI and earlier, Reduced interval between oil changes	Caterpillar, Cummins
XE6 ECO 5W-30	Euro VI and some Euro Vs*	Euro VI	Euro VI and earlier	Caterpillar, Cummins, Deutz, New Holland, Liebherr, etc.
ME6 ECO 10W-30	Euro VI and some Euro Vs*		Euro VI and earlier	Caterpillar, Cummins
DG6 ECO 10W-40	Euro VI and earlier	Gas: Euro VI and earlier	Euro VI et antérieur	Caterpillar, gas engines
SG6 15W-40				Caterpillar (Diesel et Gaz)

→ STARMATIC FAMILY - AUTOMATIC GEARBOX

Ensure full protection of automatic transmissions, power steering and hydraulic couplings with STARMATIC products. Designed to avoid jolting at low temperatures and prevent the formation of deposits, they guarantee that your fleet will remain mobile. Suitable for all uses where a Dexron® III lubricant is recommended.

STARMATIC A-MAX

- Synthetic lubricant for the latest Allison automatic transmissions
- Gives the longest oil change intervals
- Excellent fluidity at low temperatures ensuring that vehicle components remain reliable

STARMATIC A3

- Highly flexible automatic gear changes thanks to its special friction properties
- Suitable for Allison gearboxes

ZF ECOFLUID A LIFE

- Lubricant for ZFECOMAT and ZF ECOLIFE automatic gearboxes
- Allows maximum intervals between oil changes

STARMATIC S3

- Suitable for automatic gearboxes of HGVs and cars
- Fluid derived from 100% synthetic technology making it possible to extend the intervals between oil changes and guaranteeing reduced maintenance costs

STARMATIC 3

- High-end lubricant for automatic transmissions, power steering, cab linkage and hydraulic couplers
- High antioxidant and anti-wear power to protect the vehicle components

→ LONGEVIA FAMILY - MANUAL AND ROBOTISED GEARBOXES

Increase your operating time with LONGEVIA Designed for both manual and robotised transmissions, these premium lubricants offer excellent performance in extreme conditions and maximum oil change intervals at all times, while keeping your vehicles running efficiently.

LONGEVIA BZV ECO 75W-80

- Formulated for Volvo and ZF manual and robotised gearboxes
- Ideal for Voith retarders with maximum interval between oil changes
- Product designed to withstand heavy loads and high temperatures

LONGEVIA BVHD ECO 75W-90

- Designed for the toughest Volvo gearbox applications
- Highly resistant to high temperatures, ideal for hot countries and the toughest applications

LONGEVIA BMB 75W-90

- Lubricant for manual gearboxes specially designed for Mercedes vehicles

→ LONGEVIA FAMILY - AXLES

LONGEVIA axle lubricants are versatile and suitable for all types of vehicles, allowing you to rationalise servicing and control the costs of keeping your vehicles on the road. They can withstand severe conditions of use, providing an optimal interval between oil changes, with excellent reliability.

LONGEVIA TCX ECO 75W-90

- Synthetic lubricant compatible with most manufacturers
- Its formulation makes it possible to reduce energy losses and therefore to save fuel
- Its high resistance to oxidation guarantees a maximum interval between oil changes up to 450,000 km

LONGEVIA TC ECO 80W-90

- Extreme pressure mineral lubricant giving excellent anti-wear reliability
- Formulated for a great number of axles
- Allows intervals between oil changes of up to 240,000 km

HD 80W-90

- Lubricant specially designed for severe loads
- High level of protection against wear and extreme pressure

LONGEVIA P ECO 80W-140

- Semi-synthetic extreme pressure lubricant for axles operating in tough conditions
- Very good thermal stability
